

FRESCOLORI® croco

Delivery and servicing surfaces exclusively by trained FRESCOLORI processing specialists, with a long-term guarantee of high quality.

Croco – Wild! A surface that could make the viewer think of the skin of a crocodile. Naturally wild and fascinating beautiful - simply different.

FRESCOLORI®croco

Material:	1 CM7 layer 1 CM1 layer
Consumption:	CM7 about 1.2 kg/m ² each layer CM1 about 0.4 kg/m ² each layer
Colour:	freely selectable
Application:	Indoor

Surfaces are prepared and primed.

- Application of the first layer of the Caramor limestone-marble plaster, in grain thickness 7
- Immediate vertical or horizontal ribbing of the surface with thick edges
- Respect the waiting times with a rest period until the next day
- Application of the second layer of the Caramor limestone-marble plaster, in grain thickness 1, in the rib direction
- Observe the quite short waiting time (touch dry)
- Polish the surface with the trowel in the ribbing direction and against it
