

FRESCOLORI® dragged

Delivery and servicing surfaces exclusively by trained FRESCOLORI processing specialists, with a long-term guarantee of high quality.

One of our massive surfaces. Raised, smoothly plastered surfaces arranged closely, in contrast, to deeper, uneven surfaces.

FRESCOLORI® dragged

Material: 2 CM7 layer
Consumption: CM7 about 2.4 kg/m² each layer
Colour: freely selectable
Application: Indoor

Surfaces are prepared and primed.

- Application of the first layer of the Caramor limestone-marble plaster, in grain thickness 7
- Observe the waiting times, with a rest period until the first layer is dry.
- Application of the second layer of the Caramor limestone-marble plaster, in grain thickness 7
- Immediate structuring of the second layer with the structure roll
- Twice smoothing of surface, easily, with the trowel, in the drying phase
