

FRESCOLORI® travertine

Delivery and servicing surfaces exclusively by trained FRESCOLORI processing specialists, with a long-term guarantee of high quality.

The open-pored living surface gives this surface its name - travertine. It is sometimes smooth and sometimes roughly condensed - a piece of nature.

A strong expressive surface with open pore optics

FRESCOLORI® travertine

Material: 1 CM7 layer
1 CM7F layer
Consumption: CM7 about 1.2 kg/m² each layer
CM7F about 1.6 kg/m² each layer
Colour: freely selectable
Application: Indoor

Surfaces are prepared and primed.

- Application of the first layer of the Caramor limestone-marble plaster, in grain thickness 7
- Observe the waiting times, with a rest period until the first layer is dry.
- Application of the second layer of the Caramor limestone-marble plaster, in grain thickness 7 (filled) in the structural direction
- In the drying phase, push the surface twice with the travertine smoothing agents
- Smooth the surface with a trowel
