

FRESCOLORI® - PRT - Protect

Data Sheet

Product description:

Combination of resin-dispersion and water

Characteristics:

- colour: milky white, dries colourless
- density: ca. 1,06 g/ml
- viscosity: low viscosity
- colourless impregnation for polished surface
- breathable
- strain hardening of surface of easily chalking plaster surfaces
- matt to semi matt

Field of application:

Special coating as a transparent impregnation of FRESCOLORI® - Caramor. FRESCOLORI® - PRT - Protect protects the surface and enhances the colour brilliance and depth. The colour of FRESCOLORI® - Caramor remains stable by FRESCOLORI® - PRT - Protect. The surface remains breathable.

Pre-treatment of the surface:

The surface must be free from soiling and separating substances, clean and viable. Regarding VOB, Part C, DIN 18363, Par. 3.

Processing:

Shake/stir before using. On FRESCOLORI® - Caramor. Apply FRESCOLORI® - PRT - Protect wet in wet with a brush or a roller until the surface is fully saturated. Smooth with FRESCOLORI – trowel. Surfaces keep their mineral optic and haptic. A repeated application of FRESCOLORI® - PRT – Protect increases the protect.

Specificity with regard to processing Frescoton:

Hereby please only use a roller or a brush wet in wet until the surface is fully saturated; no leveling with a trowel.

Drying:

Care for good ventilation during application and drying. Low temperatures and/or a bad ventilation can have a negative effect on the drying.

Storage:

By temperatures between 5°C and 30°C FRESCOLORI® - Sealer Gel is storable for 10 months in the unopened original packaging.

Packaging:

1 liter, 2,5 liter, 4 liter, 8 liter

Safety Notes:
