

## **FRESCOLORI® earth**

Delivery and servicing surfaces exclusively by trained FRESCOLORI® processing specialists, with a long-term guarantee of high quality.

Fine Caramor limestone marble finds here its liveliness – larger raised smoothly plastered surfaces contrast uneven deep surfaces. Like a hidden treasure, the delicately shimmering little golden highlights appear.

<b>Material:</b>	2 CM1G layers
<b>Consumption:</b>	CM1G about 1.2 kg/m <sup>2</sup> each layer
<b>Colour:</b>	freely selectable
<b>Application:</b>	Indoor

Surfaces are prepared and primed.

- Application of the first layer of the CARAMOR® limestone-marble plaster, in grain thickness 1, with added mica in full surface contact
- Observe the waiting times, with a rest period until the first layer is dry.
- Application of the second layer of the CARAMOR® limestone-marble plaster, in grain thickness 1, in full surface contact
- Pulling the material upwards (suction effect)
- Scratching the surface with mica
- Execute a double smoothing of the surface in the drying phase, with the trowel, without water
- Respect the waiting times with a rest period until the next day
- Polishing (grain size 1000)
