MAINTAINING CARAMOR®

It is as easy as it sounds! Light smudges, such as the kind that can be easily left on walls by shoes, suitcases, furniture or other objects, can be quickly and easily removed from CARAMOR® surfaces using a sanding pad.

This is a decisive advantage, including in particular

for hotels or restaurants, where walls must meet the highest standards. CARAMOR® gives you beautiful walls that are easy to maintain.

Remove smudges
with a sanding pad!

FRESCOLORI® – ON-SITE SUPPORT

FRESCOLORI® stands for particularly high quality and outstanding quality surfaces. Our partner companies that process our products, including CARAMOR®, receive training from us. They also offer high-quality workmanship and abide by the highest quality standards. We are always at your side as a strong and reliable partner to provide you with support for even the most challenging or extensive projects.

we are needed. We can support our processors thanks to our many years of experience providing on-site support, and we ensure that projects are carried out accurately, efficiently, and to the highest quality standards. When you are a FRESCOLORI® partner, you can order our on-site support services for anywhere from a single day to even the entire project phase.

We can come to you where

♥ HEALTHY INDOOR CLIMATE

In addition to its extraordinary appearance, FRESCOLORI® lime marble plaster offers still further advantages. CARAMOR® promotes well-being by establishing a healthy balance for your indoor climate. By regulating humidity, the air quality in all rooms is improved.

The natural components of the lime marble plaster and the unique harmony that is created by its surface, appearance, and play of colours set a unique and soothing atmosphere in every home.

🍃 NATURAL RAW MATERIALS

FRESCOLORI® surfaces actively contribute to a greater sense of well-being, and the natural raw ingredients of the product allow you to enjoy an optimal indoor climate. Other than lime, the basic ingredient of CARAMOR® is the natural treasure of Tuscany: Carrara marble, which was formed about 30 mil-

lion years ago. Overall, FRESCOLORI® lime marble plaster consists of over 96% natural ingredients, which noticeably produce a pleasant and stimulating effect on body, mind, and soul in all rooms that are finished with it.

∞ SUSTAINABILITY

Every person has a responsibility to care for his home, family as well as the natural world. This was and still is a guiding principle for the development of FRESCOLORI® surfaces. We are fully aware of this responsibility, and we incorporate this philosophy into our products. That is why we created our critically acclaimed and extremely popular lime plaster, which

is made of exquisite, natural raw materials. It protects the resources of our earth in accordance with the model of the natural lime cycle.
